WORK EXPERIENCE

FinBox | Frontend Developer Intern

Jun 2023 - present

- Developed **API integration feature** which enabled client to seamlessly integrate their custom variables via an API into the **credit decision-making** process.
- Built dashboard for **alert system**, empowering clients to customize timely event alerts while **optimizing server performance** through efficient API result caching with React Query.
- Switched from conventional controlled forms to the React Hook Form, yielding a substantial **reduction in component reloads** during user interactions and thereby elevating the overall user experience.
- Created **reusable components** and TypeScript types, resulting in reduced development time and improved scalability.
- Got exposure to external libraries like headlessUI
- Tech used - Reactjs, Typescript, Tailwind, ReactQuery, React Hook Form, headlessUI

Instamedz | Full Stack Developer Intern

Dec 2022 - Mar 2023

- Responsible for revamping the website and improving user experience by collaborating with the UI/UX team and making it mobile-responsive also.
- Developed, and integrated API with Database using Expressjs, Nodejs, and MongoDB.
- Tech used - HTML, CSS, Javascript, Reactjs, Nodejs, Expressjs, MongoDB(basic), Figma(basic)

PROJECTS

StackOverflow Clone [Link](#)

- Developed a StackOverflow clone using the MERN stack.
- Implemented features such as authentication, question, and answer posting, upvoting/downvoting.

E-Commerce Website(furniture) [Link](#)

- Developed an e-commerce website with a microservice architectural back-end layout, utilized RestAPIs for integration purposes, and connected it to the NoSQL data layer MongoDB.
- Added features like sorting, searching on the frontend side.

FoodBlog Website [Link](#)

- Created a responsive food blogging website using core tools like HTML, CSS and Javascript.
